Length: 4' 3" (1.29m), Width: 4" (0.10m), Height: 7' 10" (2.13m)

**St UB KF**

See page 22 for more Wheelchair-Accessible Equipment

## E-Line Wheelchair-Accessible Rickshaw

Based on the traditional rickshaw equipment, this piece allows strengthening of the chest, shoulders and triceps to enhance the user's ability for propulsion and transfers. Right and left arms are independent to allow unilateral presses, or a swivel can attach the arms to do simultaneous presses. Includes a swivel handgrip on both sides, which allows a narrow or wide grip. The frame allows the user to modify their own weight stack resistance instead of relying on another person and without needing to reach down.

**Product ID: eRKSH**

Length: 4' 4" (1.32m), Width: 3' 5" (1.04m), Height: 2' 7" (0.78m)

**St Co UB WC**

**NEW**

The E-Shade is a new product line for TriActive America. These structures are used to provide shade for equipment users. The roof sections have perforations to allow minimal light passage. The E-Shades are manufactured to the same high standards as our E-Line equipment, and are available in 14 color options. Designed, manufactured, and electro-coated for superior rust protection. This line is fully "Made in the U.S.A.," and has an extended warranty of 10 Years.

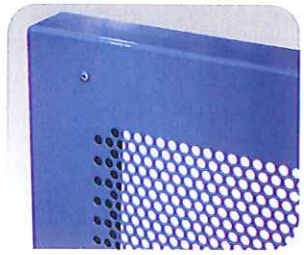

**NEW**

**Single Wing Shade**

With the Wing Shade you can select the Single, Double, or Triple Wing Shade and shade up to 3 exercise stations from one pole. This uniquely designed equipment allows good shade coverage with a small installation cost & site footprint. Designed and e-coated for superior rust prevention. (other exercise equipment not included)
